

## OVERVIEW

Enhance your current EMS system with Steelcase RoomWizard™ wall-mounted scheduling units. Connecting the touch-screen display to EMS through the EMS/RoomWizard interface\* gives users the option of booking a room in advance through EMS or on-the-spot using the RoomWizard.

The RoomWizard's flat-panel displays the room's schedule and also a red or green light to indicate if the room is currently occupied or available. By combining the two booking methods, organizations can eliminate scheduling conflicts, optimize room utilization and track impromptu usage.

\*The EMS and RoomWizard interface is available through Dean Evans & Associates, Inc. The Room Wizard Display units are available from Steelcase ([www.steelcase.com](http://www.steelcase.com))

**Whether you reserve a room through EMS in advance or on-the-spot with the RoomWizard unit, the information is always recorded in EMS and checked against existing reservations to prevent double-bookings.**

## FEATURES AND BENEFITS

- RoomWizard units show times, dates, topics, meeting host and more for each booking
- Red/green light indicators for at-a-glance availability information
- Optimized room utilization
- EMS/RoomWizard interface compatible with all EMS products: EMS Lite™, EMS Professional™, EMS Enterprise™ and EMS Campus™
