

OVERVIEW

EMS Master Calendar can be configured to gather and display event data from a variety of other sources including, of course, an EMS room scheduling database. This configuration requires the EMS Master Calendar Data Connector.

FEATURES AND BENEFITS

- Optional module
- Provides a direct connection to any EMS room scheduling database
- Enables data import from tab-delimited or XML files
- Keeps your system up-to-date with scheduled, automated imports
- Works with all versions of EMS Master Calendar

Keep your calendars current...automatically...with the EMS Master Calendar Data Connector!
