

## WHAT'S NEW IN EMS LITE EARLIER RELEASES (7.0 AND BEFORE)

FEATURE	DETAILS
<b>Search functionality in Configuration</b>	Find resources faster! A new Search function allows you to find resources in Configuration.
<b>Reservation Book filtering</b>	More Reservation Book functionality. Users now have the option to filter the Book to show rooms with bookings, rooms without bookings, or both. A count of the number of rooms in the resulting display is also shown.
<b>Virtual EMS Mobile™</b>	Virtual EMS is now compatible with newer generation mobile devices. Users are able to make a room request and view/cancel their bookings using a simplified interface. Note: Virtual EMS Mobile™ is compatible with most newer generation cellular phones via their web browser. This includes devices running Windows Mobile®, the BlackBerry® smartphone and iPhone®.
<b>Reservation Book/report room sorting</b>	Use the new Room Sequence field to see Reservation Book results and report output in whatever order you like.
<b>Logo on Confirmations and invoices</b>	Dress up your documents. Add your logo to Confirmations and invoices.
<b>New parameter: Max Length for Event Name</b>	Keep it short... Or long! This new parameter controls the maximum allowable event name users can enter when creating a reservation.
<b>Event Calendar report enhancements</b>	The Event Calendar report can now be printed in weekly format by room. Also, cancelled events can now be shown in a strikethrough font.
<b>Component room options on Room Cards report</b>	The Room Cards report now has options for including/excluding room cards for component rooms.
<b>Reservation Comments in Virtual EMS</b>	Spread the word! Reservation Comments can now be displayed in Virtual EMS.
<b>New parameter: Sequence of Available Rooms Upon Search</b>	This Virtual EMS parameter allows you to control the room order (Book Sequence or Room Description) in the room grid.
